## 5:15 PM – THE TOUR BEGINS

**Overview:** We will arrive at Northern Row Brewery & Distillery and will talk about the history of this building including the Carnegie Steel beams that were used in the construction. Next, we will walk 10 mins over to the former Linck Brewery Tunnels that were built in 1850. We will briefly walk through Findlay Market during the tour. We will talk about the history of this oldest market in the state of Ohio. Its founder James Findlay and the unique construction of the market itself. Next, we walk to the Rhinegeist Brewery, we do not go into this brewery but we talk about the history of the building and the role it played in the beer industry in the 1800's in Cincinnati. Then we return to Northern Row Brewery for a beer tasting for our guests that are 21 and over.

We will be splitting into two groups in order to keep the group sizes manageable. One group will stay with Craig and go through the tunnels. The other group will follow Miranda and will stay outside on the grounds.
